Notification of Price Review reconsideration

The Board of Energy Regulatory Office hereby gives notice of its intention to open a reconsideration of the review of the allowed costs and revenues of the individual business activities of KEK for the period 2007-09, in accordance with our Rule on Principles of Calculation of Tariffs in the Electricity Sector (Pricing Rule), and Tariff Methodology issued by the Board on 15/12/2005 and 16/11/2006 respectively.

This reconsideration has been made necessary on the basis of KEK's request of 25th April 2007 submitted to ERO (published in our web-site), in which new evidence regarding capital expenditure of KEK and achievable "Non-Technical Losses" came into light rendering the further examination of the matter essential, according to items a) and d) of Article 30.2 of Pricing Rule.

Any party wishing to submit comments on the justification or not of the reopening of the Price Review case, is invited to send these to ERO either by e-mail to ERO.PRICING-TARIFFS@eumik.org or by fax or letter marked for the Attention to the Tariffs & Prices Department not later than 4th May 2007.
